Re: Ms Natalie Pik: Clinical Hypnotherapist: Diploma of Health – Clinical Hypnotherapy

To whom it may concern:

The Diploma of Health - Clinical Hypnotherapy offered by the Academy of Hypnotic Science is one of only two courses in Clinical Hypnotherapy in Australia that is accredited by both the State Government and Commonwealth Government Education Departments.

I am pleased to confirm that on December 12, 2004 Ms Natalie Pik graduated from the Academy of Hypnotic Science with the Diploma of Health – Clinical Hypnotherapy.

Natalie demonstrated a high degree of dedication and commitment to her studies and was regarded as having highly developed skills in the practice of clinical hypnotherapy by the time she graduated.

Each two years the Academy offers a small number of Diploma graduates the opportunity to undertake our much sought after and highly prestigious Masters Year. These graduates are selected on the basis of demonstrating both advanced abilities in hypnotherapy and a high level of commitment to ongoing professional development.

In recognition of her skills and her professional approach to therapy Natalie was selected for the Masters program in 2005 however her return to Israel meant that she was unable to take up this opportunity.

Natalie and I have been in regular communication since her return to Israel and we have discussed clinical and therapeutic issues involved in quite a number of the more complex cases she has managed since returning.

I am continually impressed by the depth of understanding and insight that Natalie brings to her work as a hypnotherapist and the caring and professional manner she displays towards her clients.

I have no hesitation in referring her to you as a highly trained and skilled hypnotherapist and as a professional clinician of the highest order.

I would be pleased to speak personally on her behalf if so desired.

Yours sincerely
Richard M Porter
